- Retail Chain (Food)
- Retail Chain (Drugstore Goods, FMCG)

Frontend-разработчик

First project.

HR project for interaction with employees. Redesign of the React project on components, with new functionality, on hooks.

Tasks:

- > Development of universal components that change depending on the data from the back and the user's role - mainly forms for sending data;
- > Implemented Lazy Loading - this increased the page loading speed;
- > Implemented a chat between users with the ability to send a file or photo.
- > Cross-review;
- > Configured redux state manager;
- > Translated the project into TypeScript;
- > Covered some of the jest components with tests.
- > Development of an adaptive mobile version of the project in accordance with the approved design;
- > Interaction with business analysts, testers to solve current problems and resolve issues with errors;

Second project:

Portal for tenders.

Redesign of the entire project.

Tasks:

- > Refactoring existing code;
- > Implementation of tables from the corporate UI library;
- > Writing your own tables with advanced functionality where you can edit data inside a cell and send it to the backend.
- > Development of modal windows with messages, with checkboxes with automatic sending to the back;

At the same time, she was involved in a part-time project using Angular - a web application for interacting with employees, notifications about important news, and surveys.

Technology stack:

React, TypeScript, webpack, css modules, Sass, Redux, Formik, Jest, GitLub, Jira.
