SUMMARY

Software Engineer with 5 years of experience specializing in frontend development with React and Angular. Expertise in designing and optimizing web applications to enhance user experience. Proven track record in delivering high-quality code and collaborating effectively with cross-functional teams. Seeking a Frontend Developer position to contribute to innovative product teams and create dynamic web applications.

EXPERINCE

X5 Retail Group - **React frontend developer**
Remote

March 2021 - October 2023

JavaScript/TypeScript React Redux Unit test i18n *Atlassian* Jira SCSS GitLub Material UI

HR project for interaction with employees.
Redesign of the React project on components, with new functionality, on hooks.
- Development of universal components that change depending on the data from the back and the user's role - mainly forms for sending data;
- Moved the logic beyond the components;
- Implemented Lazy Loading - this increased the page loading speed - *34%*;
- Implemented a chat between users with the ability to send a file or photo;
- Code review;
- Set up redux state manager;
- Testing on jest - *this reduced the load on testers*.
- Development of an adaptive mobile version of the project in accordance with the approved design;
- Interaction with business analysts, testers to solve current problems and resolve issues with errors.

Tender platform for stores and suppliers.
Redesign - the main idea was to combine 4 projects with the old design into two with a new one.
- Parsing warnings
- Refactoring of existing code;
- Implementation of tables from the corporate UI library;
- Wrote a table with advanced functionality where you can edit data inside a cell and send it to the backend.
- Developed a modal window with messages, with checkboxes with automatic sending to the back;

In parallel with the second project, I was involved in a part-time project using Angular - a web application for interacting with employees, notifications about important news, and surveys.

AICapital finance startup - React frontend developer   *Remote*
April 2019 - May 2021

TypeScript React Redux Unit test i18n *Atlassian* Jira SCSS GitHub Material UI JointJS
- Developed MVP react SPA to visualize the operation of financial application algorithms - diagrams, tables
- Developed a user's personal account

WebStudio BTB-Development - frontend developer   *Remote*
February 2018 - March 2021

JavaScript Gulp *Atlassian* Jira SCSS GitHub Slick Animation Responsive Design React

- Landing page development native JS+HTML+SCSS SPA/React
